DETAILED ACTION

Current Status

1. Claims 1-6 are pending in the application.
2. This action is responsive to Applicants' amendment of 12 December 2008.
3. Receipt and entry of Applicants' amendment is acknowledged.
4. The 102 and 103 rejections have been withdrawn following Applicants amendments.

This application is a 371 of PCT/JP04/1 7628 11/26/2004

Allowed Claims

Claims 1-6 are allowable over the prior art of record.

Reason For Allowance

The following is an examiner's statement of reasons for indicating allowable subject matter: A search of the prior art failed to uncover any reference that anticipates or renders obvious a process of making a phosphonium borate compound, as claimed by applicants.

The closest prior art is Kinashi et al., {JP 62-149721}. Kinashi et al. teach tetraphenylborate salt obtained by the reaction of boron compound and trialkylphosphine. Kinashi et al. process for making tetraphenylborate salt is different from Applicants claimed process in that Applicants claimed process involves the use of inorganic acids. The differences are not readily apparent and would not have been suggested to one of ordinary skill.

Claims 1-6 are allowed.

Art Unit: 1621

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
